Chapter 1

Namespace Index

1.1 Namespace List

Here is a list of all namespaces with brief descriptions:

Ui	9
------------------------------	---

Chapter 2

Hierarchical Index

2.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

QWidget	
FramelessWindow	11

Chapter 3

Class Index

3.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

[FramelessWindow](#)

Unique Frameless window or Titlebar class built in Qt 6 with customization in mind. Inherits
QWidget

[11](#)

Chapter 4

File Index

4.1 File List

Here is a list of all files with brief descriptions:

framelesswindow.cpp	19
framelesswindow.h	19

Chapter 5

Namespace Documentation

5.1 Ui Namespace Reference

Chapter 6

Class Documentation

6.1 FramelessWindow Class Reference

Unique Frameless window or Titlebar class built in Qt 6 with customization in mind. Inherits QWidget.

```
#include <framelesswindow.h>
```

Inheritance diagram for FramelessWindow:

Public Types

- enum `TitleMode` {
`CleanTitle` , `OnlyCloseButton` , `IconOff` , `MaxMinRollOff` ,
`MaxMinOff` , `FullScreenMode` , `MaxOff` , `MinOff` ,
`RollOff` , `FullTitle` }

Enum for various title bar modes.

Public Member Functions

- `FramelessWindow` (`QWidget *parent=nullptr`)
FramelessWindow.
- void `dropShadow` (bool on=true)
Enables drop shadow effect.
- int `getGlobalState` ()
Helps in knowing whether window is maximized or in restored state.
- int `getFullSCState` ()
Helps in knowing whether window is fullscreen or in restored state.
- int `getRollState` ()
Helps in knowing whether window is rolled up or rolled down.

- void [setTitle](#) (QString title)
Sets the titlebar text.
- void [setTitleFont](#) (QFont font)
Sets the titlebar font to font.
- void [setTitleStyle](#) (QString stylesheet)
Sets the titlebar text stylesheet to stylesheet.
- void [setTitleBarMode](#) ([TitleMode](#) flag)
Sets the title bar mode from flag.
- void [setAppIcon](#) (QIcon appicon)
Sets the app icon to appicon.
- void [setMinIcon](#) (QIcon minicon)
Sets the minimize icon to minicon.
- void [setMaxIcon](#) (QString maxres=":/app_max.png", QString restres=":/app_rest.png")
Sets the maximize and restore icons to maxres and restres, provided both are resources.
- void [setRollIcon](#) (QString rollup=":/rollup.png", QString rolldown=":/rolldown.png")
Sets the roll up and roll down icons to rollup and rolldown, provided both are resources.
- void [setCloseIcon](#) (QIcon closeicon)
Sets the close icon to closeicon.
- void [setMenuBar](#) (QMenuBar *menuBar=nullptr, bool hidden=false)
Sets the menubar of the frameless window from a given menu bar. Parameter "hidden" is set to false by default. If set to true, menubar will be hidden.
- void [hideMenuBar](#) (bool y=true)
Hides the menu bar.
- void [setCentralWidget](#) (QWidget *centralWidget)
Sets the central widget to centralWidget.

Protected Member Functions

- void [handleEdgeHit](#) ()
Handles edge hit while moving or resizing window.
- void [moveWindow](#) (QMouseEvent *event)
Function that deals with moving the window.

6.1.1 Detailed Description

Unique Frameless window or Titlebar class built in Qt 6 with customization in mind. Inherits QWidget.

6.1.2 Member Enumeration Documentation

6.1.2.1 TitleMode

```
enum FramelessWindow::TitleMode
```

Enum for various title bar modes.

Enumerator

CleanTitle	Hides everything except the title text
OnlyCloseButton	Hides everything except the close button and title text
IconOff	Hides only the app icon
MaxMinRollOff	Hides the maximize, minimize and roll button
MaxMinOff	Hides the maximize and minimize button
FullscreenMode	Window becomes fullscreen
MaxOff	Hides maximize button
MinOff	Hides minimize button
RollOff	Hides roll button
FullTitle	Nothing is hidden, default mode

6.1.3 Constructor & Destructor Documentation

6.1.3.1 FramelessWindow()

```
FramelessWindow::FramelessWindow (
    QWidget * parent = nullptr ) [explicit]
```

[FramelessWindow](#).

Parameters

<i>parent</i>	a QWidget
---------------	-----------

6.1.4 Member Function Documentation

6.1.4.1 dropShadow()

```
void FramelessWindow::dropShadow (
    bool on = true )
```

Enables drop shadow effect.

Parameters

<i>on</i>	a boolean
-----------	-----------

6.1.4.2 getFullSCState()

```
void FramelessWindow::getFullSCState ( ) [inline]
```

Helps in knowing whether window is fullscreen or in restored state.

Returns

6.1.4.3 getGlobalState()

```
int FramelessWindow::getGlobalState ( ) [inline]
```

Helps in knowing whether window is maximized or in restored state.

Returns

an integer

6.1.4.4 getRollState()

```
int FramelessWindow::getRollState ( ) [inline]
```

Helps in knowing whether window is rolled up or rolled down.

Returns

an integer

6.1.4.5 handleEdgeHit()

```
void FramelessWindow::handleEdgeHit ( ) [protected]
```

Handles edge hit while moving or resizing window.

6.1.4.6 hideMenuBar()

```
void FramelessWindow::hideMenuBar (
    bool y = true )
```

Hides the menu bar.

Parameters

<i>y</i>	a boolean
----------	-----------

6.1.4.7 moveWindow()

```
void FramelessWindow::moveWindow (
    QMouseEvent * event ) [protected]
```

Function that deals with moving the window.

Parameters

<i>event</i>	a QMouseEvent*
--------------	----------------

6.1.4.8 setAppIcon()

```
void FramelessWindow::setAppIcon (
    QIcon appicon )
```

Sets the app icon to appicon.

Parameters

<i>appicon</i>	a QIcon
----------------	---------

6.1.4.9 setCentralWidget()

```
void FramelessWindow::setCentralWidget (
    QWidget * centralWidget )
```

Sets the central widget to centralWidget.

Parameters

<i>centralWidget</i>	a *QWidget
----------------------	------------

6.1.4.10 setCloseIcon()

```
void FramelessWindow::setCloseIcon (
    QIcon closeIcon )
```

Sets the close icon to `closeIcon`.

Parameters

<i>closeicon</i>	a QIcon
------------------	---------

6.1.4.11 setMaxIcon()

```
void FramelessWindow::setMaxIcon (
    QString maxres = ":/app_max.png",
    QString restres = ":/app_rest.png" )
```

Sets the maximize and restore icons to `maxres` and `restres`, provided both are resources.

Parameters

<i>maxres</i>	a QString
<i>restres</i>	a QString

6.1.4.12 setMenuBar()

```
void FramelessWindow::setMenuBar (
    QMenuBar * menuBar = nullptr,
    bool hidden = false )
```

Sets the menubar of the frameless window from a given menu bar. Parameter "hidden" is set to false by default. If set to true, menubar will be hidden.

Parameters

<i>menuBar</i>	a QMenuBar*
<i>hidden</i>	a boolean

6.1.4.13 setMinIcon()

```
void FramelessWindow::setMinIcon (
    QIcon minicon )
```

Sets the minimize icon to `minicon`.

Parameters

<i>minicon</i>	a QIcon
----------------	---------

6.1.4.14 setRollIcon()

```
void FramelessWindow::setRollIcon (
    QString rollup =(":/rollup.png",
    QString rolldown =(":/rolldown.png" )
```

Sets the roll up and roll down icons to rollup and rolldown, provided both are resources.

Parameters

<i>rollup</i>	a QString
<i>rolldown</i>	a QString

6.1.4.15 setTitle()

```
void FramelessWindow::setTitle (
    QString title )
```

Sets the titlebar text.

Parameters

<i>title</i>	a QString
--------------	-----------

6.1.4.16 setTitleBarMode()

```
void FramelessWindow::setTitleBarMode (
    TitleMode flag )
```

Sets the title bar mode from flag.

Parameters

<i>flag</i>	a TitleMode
-------------	-------------

6.1.4.17 setTitleFont()

```
void FramelessWindow::setTitleFont (
    QFont font )
```

Sets the titlebar font to font.

Parameters

<i>font</i>	a QFont
-------------	---------

6.1.4.18 setTitleStyle()

```
void FramelessWindow::setTitleStyle (
    QString stylesheet )
```

Sets the titlebar text stylesheet to stylesheet.

Parameters

<i>stylesheet</i>	a QString
-------------------	-----------

The documentation for this class was generated from the following files:

- [framelesswindow.h](#)
- [framelesswindow.cpp](#)
